The plan to terraform
extrasolar planets is
about to be realized.

As I speak, the mass-produced
NX-series robots are aboard
and ready for launch.

They will journey
to a solar system
one thousand
light years
away

And
endeavor to
transform
three of its
planets into
new Earths.

as part of their
thousand-year
mission to
terraform these
three planets

The robots will break
down the existing ice-
locked land masses to
liberate carbon dioxide
and water vapor. They
also carry bacteria and
plant seeds to sow in the
newly created land,
which will become the
basis for new organisms

HEY,
THEY'RE ONLY
SHOWING THE
BOX.

OH!

WHY
AREN'T THEY
SHOWING MY
MASTER-
PIECE?

THERE THEY
ARE, THERE
THEY ARE!

DON'T
THEY HAVE
A CAMERA
IN THERE?

YOU PICK

ISN'T THIS THE
SAME THING?
WHILE WE'RE
SITTING HERE,
THEY'RE OFF
TO SPACE

AND IN A
THOUSAND
YEARS, THEY'LL
HAVE TURNED
THOSE PLANETS
INTO SOMETHING
LIKE EARTH.
